## TECH STACK

React (TypeScript)  
Next.js, Astro  
Node.js, Express  
MongoDB / NoSQL  
REST APIs  
Tailwind CSS  
Electron  
Firebase, Vercel

## LANGUAGES

English: B2 reading/listening, B1 speaking  
Spanish: Native

## EDUCATION

Full Stack Developer —  
CoderHouse  
(Top 10%, 2023–2025)

Electronic Engineering — UTN  
(Incomplete)

## PROFESSIONAL SUMMARY

Frontend Engineer specialized in React/TypeScript, focused on scalable UI architecture and predictable component systems. Experience building internal tools for logistics and retail, working with real operational data and complex flows.

Strong frontend-first profile with solid fundamentals in lightweight backend development using Node.js/Express.

## KEY PROJECTS

### Control de Cubiertas — Fleet Tire Management System

React · Electron · Node.js · MongoDB

- Developed the full UI for a fleet management system used by 45–65 vehicles.
- Packaged as a Windows-ready Electron desktop app with 100% offline operation.
- Designed structured workflows, validations, and maintenance history used daily by operators.

### Artemisa — Retail E-Commerce + Admin Panel

React · Tailwind · Node.js

- Built the complete admin interface for a retail catalog of approximately 350 products.
- Implemented clean component patterns and responsive layouts across the panel.
- Integrated Node.js APIs including JWT authentication, CRUD operations, and image handling.

### QrStyles — Advanced QR Customization Tool

JavaScript · Canvas · SVG

- Built a customizable QR generator with gradients, shapes, margins, and embedded logos.
- Implemented SVG export for high-quality printing and branding assets.

## PROFESSIONAL EXPERIENCE

### Frontend Developer — Artemisa (Freelance)

Sep 2024 – May 2025

- Developed React interfaces for sales, stock, and quoting workflows used daily by the retail team.
- Improved UX flows and supported integrations with Firebase, MercadoPago, and Vercel.

### Independent Developer

2024 – Present

- Delivered dashboards, admin tools, and internal systems for small businesses.
- Built lightweight Node.js APIs and integrated external services as required.
