Professional Summary

Frontend Engineer specialized in **React/TypeScript**, focused on building maintainable UI architectures, reusable component systems, and predictable state management. Experienced delivering complete features and internal tools for logistics and retail environments.

Supports frontend work with lightweight backend using **Node.js/Express** (auth, CRUD APIs, integrations). Product-minded, fast iteration, clean code, and strong analytical reasoning. Open to relocation.

Core Technical Skills

React.js (TypeScript)	Next.js / Astro	Custom Hooks	Component Patterns
State Management	Node.js / Express	MongoDB	Tailwind CSS
Electron (Desktop Apps)	API Integrations		

Key Projects

Control de Cubiertas — Fleet Tire Management System

React · Electron · Node.js · MongoDB

- Developed the complete UI in React using reusable components, global state, and structured operational workflows.
- Migrated the system to a Windows-ready Electron build enabling **100% offline usage**.
- Designed tables, forms, validation flows, and maintenance/history tracking for real logistics operations.

Artemisa — Retail E-Commerce + ERP Light

React · Tailwind · Node.js

- Built the full admin UI: dashboards, dynamic tables, quoting flow, stock management, and client views.
- Applied component patterns and responsive layouts using Tailwind.
- Integrated the frontend with Node.js APIs (JWT auth, CRUD, image handling).

CanelaCakes — Digital Menu + QR Tool

Astro · Tailwind · UX

- Designed a mobile-first single-page digital menu optimized for speed and clarity.
- Created a custom QR generator tool with brand-adapted styles.

Professional Experience

Frontend Developer — Artemisa (Freelance)

Sep 2024 – May 2025

- Developed React interfaces for operational modules (dashboard, stock, sales).
- Improved UX and interaction flows for critical commercial processes.
- Provided support for integrations (Vercel, Firebase, MercadoPago).

Independent Developer

2024 – Present

- Delivered frontend-heavy tools, admin panels, dashboards, and client interfaces.
- Integrated lightweight Node.js APIs and external services when needed.

Education

Full Stack Developer — CoderHouse (Top 10%, 2023–2025)

- Graduated with distinction. Strong foundation in web architecture and modern frontend ecosystems.

Electronic Engineering (Incomplete) — UTN

- Solid base in logic, problem solving, and system architecture.
