CORE TECH STACK

React.js (TS)

Next.js / Astro

Node.js / Express

MongoDB / NoSQL

Tailwind CSS

Electron

EDUCATION

Full Stack Developer —

CoderHouse

(Top 10%, 2023–2025)

Electronic Engineering — UTN

(Up to 3rd year)

METHODOLOGIES

Clean Architecture

Component-Driven Development

Problem Solving

Remote Collaboration

PROFESSIONAL SUMMARY

Frontend Engineer (React/TypeScript) experienced in building scalable interfaces using React, Next.js, Astro, Tailwind and clean component architecture. Strong problem decomposition and reusable component design.

I support my frontend work with lightweight Node.js/Express APIs when needed. Real-world experience delivering complete products for logistics and retail.

KEY PROJECTS

Control de Cubiertas — Inventory Desktop App

React · Electron · Node · MongoDB

- Designed full UI architecture in React using reusable components, global state and predictable flows.
- Implemented backend API logic (CRUD, history tracking, assignment flows).
- Packaged as Windows desktop app via Electron with offline persistence.

Artemisa — E-Commerce Frontend

React · Tailwind · Component Patterns

- Built complete frontend: catalog, filters, search, hierarchical categories and pagination.
- Checkout flow with react-hook-form, validation and persistent cart syncing.
- Implemented URL-based filters, responsive UI logic and clean navigation patterns.

EXPERIENCE

Frontend Developer — Artemisa (freelance)

Sep 2024 — May 2025

- Developed React interfaces for sales, stock and quoting flows.
- Improved UX across the admin panel and simplified critical flows.
- Supported integrations with Vercel, Firebase and MercadoPago.

Independent Developer

Current

- Built interfaces, dashboards and tools for small businesses.
- Integrated lightweight Node.js APIs when required.

ADDITIONAL SKILLS & TOOLS

- Version Control: Git, GitHub.
- API Testing: Postman, Jest.
- Cloud & Hosting: Firebase, Vercel, Render.
- UI Design: Figma, Responsive Design.
